(with Microsoft AXAPTA )

In Collaboration With

WEBEL

## WEBEL ONTRACK ERP SCHOOL

### WHAT IS ERP?

ERP, Enterprise Resource Planning is a way to integrate the data and processes of an organization into one single system. The term ERP originally referred to how a large organization planned to use organizational wide resources. In the past, ERP systems were used in larger more industrial types of companies. However, the use of ERP has changed and is extremely comprehensive. Today the term can refer to any type of company, no matter what industry it falls in. In fact, ERP systems are used in almost any type of organization - large, medium or small across any segment of industry.

ERP solutions have dramatically impacted the business world in the last few years and this trend is certainly to continue well into the future. Many companies have discovered the advantages of investing in ERP solutions and have successfully addressed corporate objectives by integrating all functions as part of their business strategy.

### TRENDS & OPPORTUNITIES

ERP industry currently is over US \$30 billion worldwide and is growing year on year. Companies all over the world have made significant investments in implementing ERP systems and will continue to invest in upgrading , maintaining & integrating their systems with new and emerging technologies and trends like WEB 2.0 , SaaS (Software as a Service) , SOA ( Service Oriented Architecture ) . Integrating mobile phones and other devices and upgrading to new hardware and system software is a continuous challenge for all companies. In this backdrop, the industry is facing acute shortage of cost effective, skilled ERP consultants.
